SUSPENSION

Monica Armani, 2013

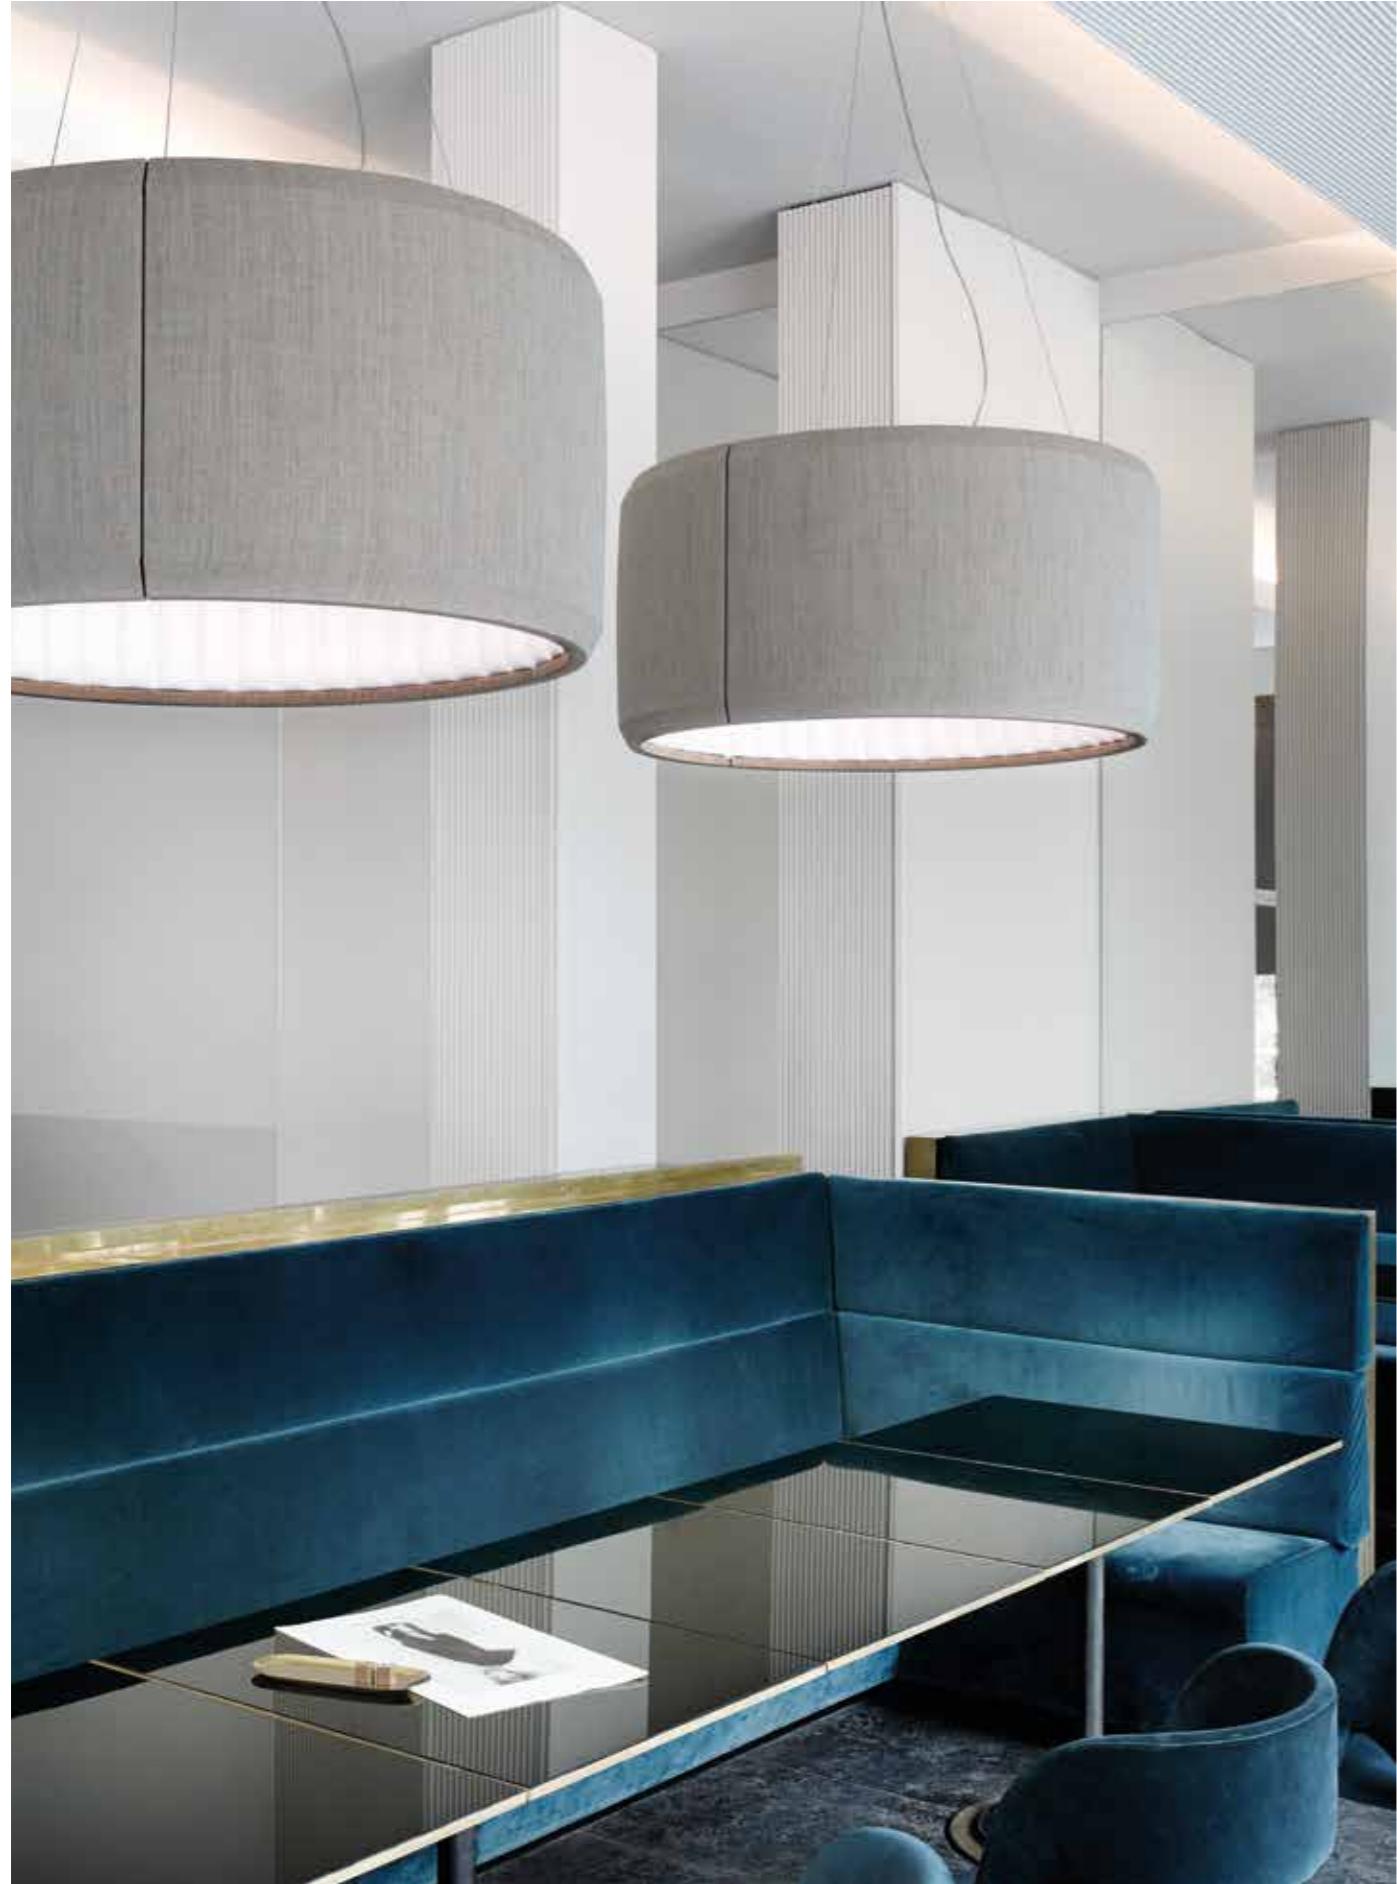

**EN Quality lighting combined with acoustic comfort and the beauty of fabrics, for this family of suspension lamps. A lighting system that matches decor solutions with high levels of sound absorption, for public and private spaces.**

**IT** La qualità della luce si accompagna al comfort acustico e alla bellezza dei tessuti nella nuova famiglia di sospensioni. Si tratta di un sistema d'illuminazione che abbina soluzioni d'arredo ad elevate prestazioni di fonoassorbimento per spazi pubblici e privati.

**DE** Qualität des Lichts, akustischer Komfort und Schönheit des Gewebes für die neue Familie von Pendelleuchten. Ein Beleuchtungssystem, das Design und Komfort mit hohem Schallschluckvermögen für öffentliche und private Räume kombiniert.

**FR** Avec cette nouvelle famille de suspensions, la qualité de la lumière se conjugue au confort acoustique et à la beauté des tissus. Il s'agit d'un système d'éclairage qui associe des solutions déco à des prestations d'absorption phonique d'une extrême qualité pour les espaces publics et privés.

**ES** La calidad de la luz va acompañada de la comodidad acústica y de la belleza de los tejidos en la nueva familia de lámparas de suspensión. Se trata de un sistema de iluminación que combina soluciones decorativas con altas prestaciones de fonoabsorción para espacios públicos y privados.

LUCEPLAN 2019/20

## 1 Model of application restaurant

### Location analysis

the quality of a restaurant is a combination of different factors: quality of food, service and environment and a good quality of speech combined with acoustic comfort.

### Solution

the Silenzio suspensions are the perfect solution because they are simple shapes which enrich the spaces thanks to the high quality of the textiles; they diffuse a comfortable light and provide high levels of acoustic absorption.

## 2 Room data

L=15 m  
W= 7 m  
H= 5,5 m

Different height from 2,5 mt to 2,9 mt AFF

**Lighting source used**  
LED module 45W

**Fixtures installation**  
5 x Silenzio Ø 90 cm  
9 x Silenzio Ø 120 cm

**Illuminance average**  
Table (min) 180 lx  
Table (max) 452 lx

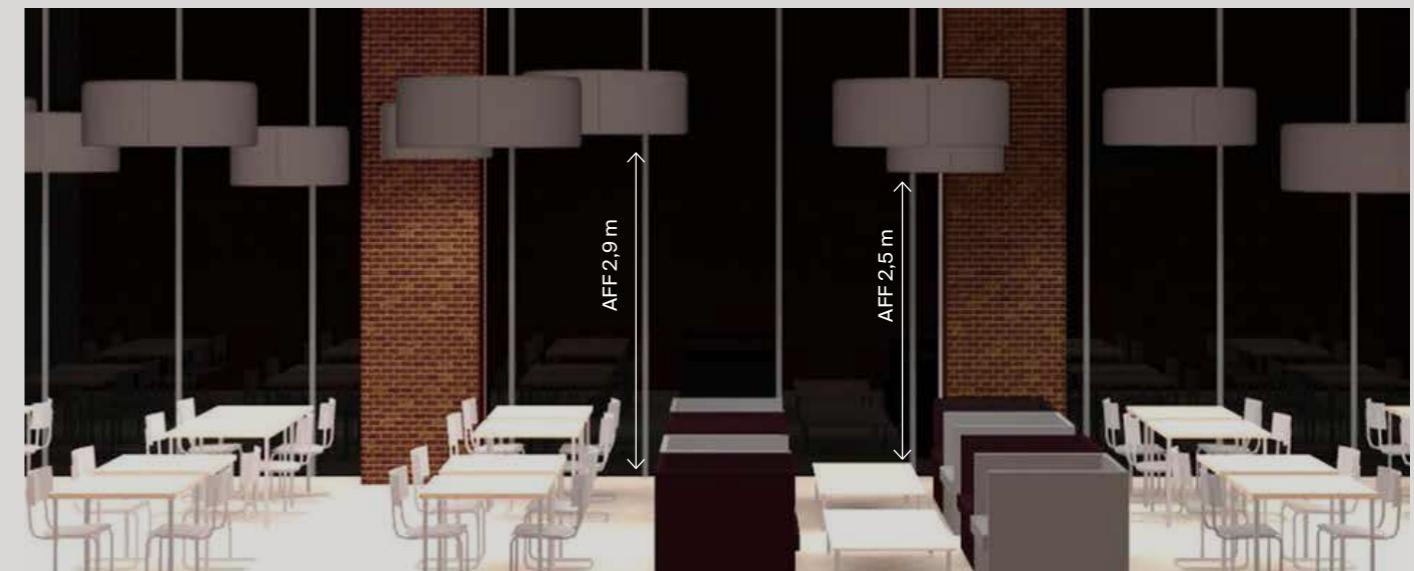

## 3 Before

time of reverberation\* 3,16 s

### After

(with Silenzio) time of reverberation 1,55 s  
Decrease of reverberation: about 51%\*\*

Measuring reverberation time allows to calculate total sound absorption. Reverberation time varies according to the frequency. If reverberation time is too long, the space can have echoes and rumbles. The data is always approximate: the software doesn't take in consideration the position of the speaker and the position of absorbent surfaces.
